Overview

B21 is a fintech company headquartered in Gibraltar and is the developer of a personal wealth management platform exclusively for cryptoassets. B21 is a mobile focused investment platform that enables the mass market to create their own portfolio of cryptocurrencies like Bitcoin, Ethereum, EOS and many others.

Problem B21 Solves

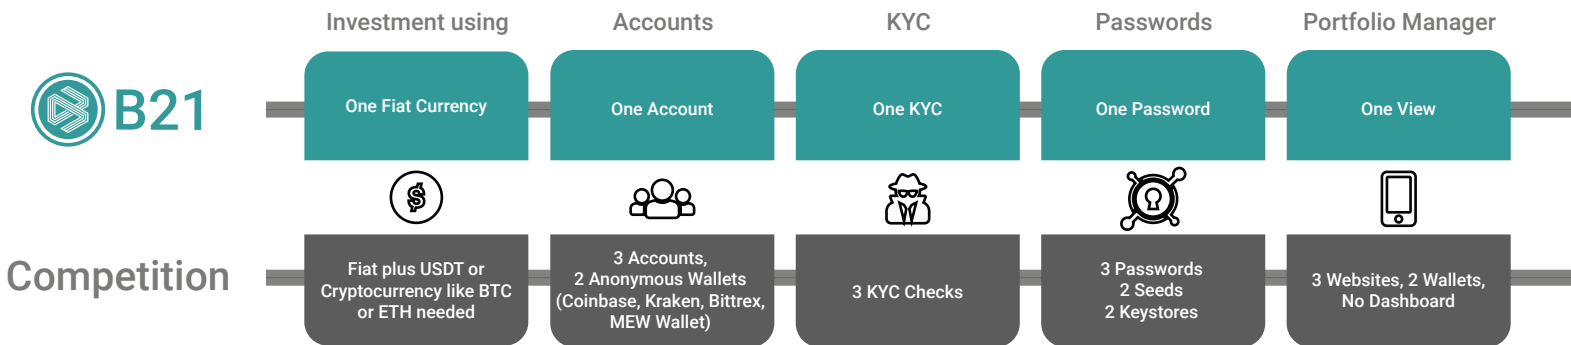

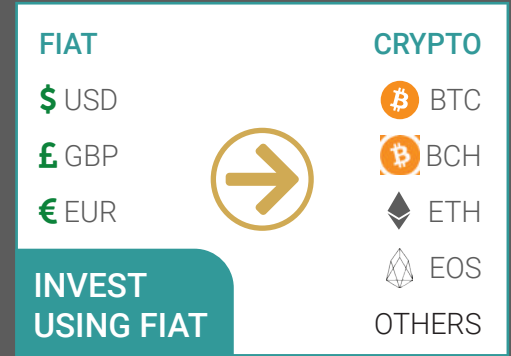

Currently investing in cryptoassets is a very complex and cumbersome

process. Investors need to be tech savvy and have a good understanding of cryptocurrencies and related technologies. As a result, the general public is reluctant to participate in the value creation taking place. B21 will make investing in cryptoassets available to the mass market.

Key Value Propositions
